"15th IEEE International Conference on Logistics and Supply Chain Management"

SOUSSE,TUNISIA , May 3-5, 2024

"Call for Papers"

LOGISTIQUA 2024

"Supply Chain: Sustainability, Digitalization, & Resilience"

ABOUT LOGISTIQUA 2024

The LOGISTIQUA conference is an international scientific event that brings together researchers, practitioners, and academics with a keen interest in Supply Chain management. This conference serves as a true hub where ideas, practices, methods, and theories are exchanged, enriching the scientific field related to Supply Chain Management.

For its 15th edition, the LOGISTIQUA conference will be held at the University of Sousse, TUNISIA. Given the post-COVID-19 situation combined with the war in Ukraine and Russia, there has been increased instability in global supply chains, especially regarding the supply of raw materials and energy.

Companies are encouraged to implement more sustainable practices to reduce their environmental impact, invest in digitalization to enhance supply chain management, and develop business continuity plans to address future disruptions. This edition places particular emphasis on the resilience and sustainability of the Supply Chain.
The primary goal is to make specialists in the field a driving force in proposing solutions to strengthen supply chain capabilities.

Full paper submission: 27/01/2024
Final acceptance notification: 27/03/2024
Submission of the final version and registration: 15/04/2024

AXES LOGISTIQUA 2024

- E-supply chain management
- Energy efficiency, vehicles, and transportation
- Environmental and social impact of transportation
- Transportation infrastructure
- Artificial intelligence, Big Data, and transportation
- Logistics and sustainable development
- Logistics and organization
- Healthcare logistics and healthcare
- Econometric modeling and urban growth

- Urban logistics
- Modeling and optimization
- Logistic processes
- Supply Chain resilience
- Green and sustainable Supply Chain
- Supply chain risk management
- Freight transportation
- Public transportation and road safety
- Economic and financial development

Articles can be written in French or English, or Arabic. They must adhere to the IEEE format (IEEE template).
Should be submitted exclusively on: sciencesconf.org.
Submission link: https://logistiqua2024.sciencesconf.org/

IMPORTANT

All submitted papers will undergo a double-blind peer review process.
Accepted papers (in English) will be included in the conference proceedings and will be submitted for potential publication IEEE and indexing.
